

## GOING PURPLE OVER POLIO!

As a Club we have been supporting the eradication of polio from the beginning and we are hopefully going to see the end! Looking at numbers the first is 24— World Polio Day (24th October). This saw the “purple squad” working their way around Worcester illuminating landmarks in purple. Excellent photos taken by professional photographer (Nigel Wood) who was also a volunteer.

The next number is 4,000—this is the number of crocus corms that have been planted at the Cathedral—we wait to see them in all their glory.

The next number is 1,240 the length of the Afghanistan/Pakistan border the last two endemic countries—the New Year will see an event themed around 1,240. Progress is being made, but the last part was always going to be challenging.
